Education

- 2025 - Present **PhD Candidate in Environmental Economics**
Paris-Saclay Applied Economics (PSAE), AgroParisTech - Palaiseau, France
Research project: *Optimal Land Use for the Energy and Ecological Transition*. Developing theoretical economic models and numerical simulations to study the allocation of heterogeneous land among food production, bioenergy and forests. The project examines carbon opportunity costs, biodiversity and carbon sequestration, specialization versus multifunctional land use, and the international spillovers of national environmental policies.
- 2024 - 2025 **Master 2 in Sustainable Development and Environmental Economics**
Université Paris-Saclay - France
Selected coursework: agricultural, water, forest and biodiversity economics; econometrics; non-market valuation; life-cycle assessment and circular economy; environmental policy instruments.
- 2023 - 2024 **Master 1 in International and Environmental Economics**
Université Paris 1 Panthéon-Sorbonne - Paris, France
Average: 15.4/20; ranked 1st of 70. Coursework included macroeconomics, microeconomics, econometrics, natural-resource economics, international trade, environmental policy, development economics and health economics.
- 2020 - 2023 **BA in Economics and Political Science**
McGill University - Montréal, Canada
GPA: 3.5/4.0.

Professional Experience

- Mar - Sep 2025 **Research Intern**
Paris-Saclay Applied Economics, AgroParisTech - Paris, France
Six-month research internship on residents' preferences for urban agriculture in priority neighbourhoods. Contributed to the design and implementation of a discrete-choice experiment, survey development, data collection and processing, econometric analysis, and presentation of results.
- Jun - Sep 2024 **Junior Analyst**
ENGIE Impact - Paris, France
Contributed to an R-based model of the development of Europe's anaerobic-digestion sector. Researched feedstock prices and their impact on sector growth; conducted spatial analysis of straw availability from local crop and livestock data using QGIS and R; processed results in Excel and prepared presentations in PowerPoint.
- Jul - Aug 2022 **Political Campaign Intern**
Dan Goldman for NY - New York City, USA
Trained and coordinated more than 30 volunteers throughout the campaign. Collected, managed and analysed voter data in NGP VAN to support field operations and campaign strategy.

Skills

- Methods** Econometrics; data analysis; discrete-choice experiments; non-market valuation; survey design
Software R; QGIS; Excel; PowerPoint
Languages French (native language); English (bilingual proficiency); Spanish (B1)

Additional Activities

- Leadership** Advocacy Coordinator, Expanding Economics, McGill University (2021 - 2023)
Sport Competitive handball for 15 years; currently at national 3 level; third place at the 2023 American Championships with the Quebec team
